

TC-43 OPTICAL MULTI METER

Optical Power Meter + VFL + LED Flashlight + RJ45 Cable Sequence

I. INTRODUCTION

TC-43 series Optical Multi Meter is mainly used for continuous optical signal power measurement, optical fiber link loss testing and optical fiber line on-off testing. Widely used in optical cable construction and maintenance, optical fiber communication, optical cable sensing, optical CATV and other fields. The fuselage design meets the requirements of human body function and adopts advanced thermoplastic moulding technology, which is beautiful and durable. The red-light integrator of optical power meter can be well protected by using embedded detectors and lasers. The tester has compact shape, automatic shutdown function, back light display, wavelength memory function, support user calibration, wide test range, support lighting.
